

June 1-5: Wilderness Wanderings

Campers will take a deep dive into all things that call the forest home! We will examine different trees, animals, and habitats while learning to be more comfortable in the woods. This week we will also explore ways to tie knots, shoot a bow, build shelters, and more! Campers will also participate in many traditional camp activities.

June 8-12 AND June 29-July 3: Aquatic Adventures

Get ready for lots of water fun! This week campers will be diving into lots of new knowledge while exploring Walnut Creek and all the critters that call the water home! Campers will also participate in many traditional camp activities.

June 15-19: Winged Wonders

Discover the world of birds and bugs! We will explore flying critters from the small Bumble Bee to the large Great Horned Owl. Campers will learn about how and why these creatures use flight for movement. Campers will also participate in many traditional camp activities.

June 22-26: Space Bound

We will be blasting off to faraway places. Campers will be taking a closer look at Earth's solar system. Working to solve mysteries of space and Earth alike through experiments and programs full of new and exciting things. Campers will also participate in many traditional camp activities.

July 6-10: Rooted in Nature *Specialty*

Girls in grades 4-8 join us for a fun, empowering, and relaxing week in nature! We will practice mindfulness, get creative, and learn about ourselves and nature all week. Campers may also participate in many traditional camp activities.

July 6-10: Ancient Elachee

Let's dig back to a time long before us. Your camper will learn about native people, dinosaurs, rocks, minerals, and so much more! Campers will also participate in many traditional camp activities.

July 13-17: Camp Rewind

This week campers will be reliving some of the most loved parts of summer. We will be circling back around to favorite camper games and activities. Campers will also participate in many traditional camp activities.

July 20-24: Expedition Elachee *Specialty*

Put on those thinking caps! This week campers (grades 4-8) will learn how to survive in the woods without the help of technology and modern equipment. Campers will learn how to build a fire, make a shelter, tell which plants are safe, and much more! Campers will also participate in many traditional camp activities.
